FULVIC MINERAL SUPPLEMENT TECHNICAL INFORMATION

"You can trace every sickness, every ailment and every disease to a mineral deficiency."

– 2 Times Nobel Laureate, Linus Pauling

WHAT ARE FULVIC MINERALS?

Fulvic minerals are the end product of the decomposition of organic matter; a compost if you will. Fulvic minerals are the smallest particles of the compost, and have all of the genetic information, nutrients, and anti-oxidant capacity of that compost.

UNIQUE CHARACTERISTICS

The fulvic minerals' molecules are so tiny that they work within the various components of the cell, both inside and out. Most importantly they work in the Mitochondria, the power generator of the cell.

Fulvic minerals also act as a delivery system. Nutrients can bond to fulvic minerals and will deliver these nutrients to any cell or tissue by crossing all barriers in the body. In addition, they will take the waste, heavy metals, pesticides, and anything that is harmful to the cell, and flush it out of the system.

FULVIC MINERALS AND THE HUMAN BODY

Fulvic minerals have been shown to improve various cellular processes, muscle functions, digestive abilities, as well as heart and brain health. It also stimulates the immune system to help defend the body from things like viruses and infections.

Fulvic minerals help cells absorb nutrients. Your body goes into defense mode or crisis due to lack of nutrients. Fulvic is carbon and contains 70+ minerals. It also helps absorb nutrients from food and other supplements.

Waste products, including age-causing free radicals are discarded as fulvic acts as an ion transporter. It gives or takes an electron, limiting the damage that free radicals can cause throughout the body. A free radical needs an electron to be neutralized. The molecule of fulvic has 14 tera-trillion electrons that it can donate: that's 21 zeros! cell duplication occurs in a healthier environment.

ELECTROLYTES & ANTIOXIDANTS

As a major source of key electrolytes and anti-oxidants, fulvic minerals help slow down aging and control inflammation. Electrolytes play an important role in hydration, blood activity, and muscle function.

TECHNICAL CHART

NuWTR

Have you had your minerals today?

Our fulvic minerals-based supplement is not only a powerful antioxidant and electrolyte; it is also very rich in trace minerals.

Benefits of Fulvic Acid:

- Reduces oxidative stress
- Provides the most powerful electrolyte in existence
- Creates an alkalizing environment and increases oxygen up to 45%
- Contains 70+ trace minerals
- Supports the immune and digestive systems
- Supports healthy circulation and creates an anti-ageing environment
- Provides usable oxygen directly to the cells
- Improves brain function, memory and mood
- Regenerates cells in a healthier environment
- Supports absorption of nutrients
- Boosts metabolism and balances hormones
- Removes toxins, heavy metals & pesticides

Our product has gone through rigorous testing and certification to ensure you get the high-quality supplement you expect and is recognized by Health Canada as a Natural Health Product (NPN80063624). World renowned specialist and formulator, Marc Saint-Onge tested and evaluated more than 60 sites to find the very best source of Fulvic minerals in Canada. Our Fulvic minerals are from a very rich source of peat extracted from organic matter that originated thousands of years ago. The NUWTR stick is a unique delivery system that keeps the potency of the Fulvic minerals until consumed so that you can maximize the benefit to your body. Each dose is individually packaged for your convenience, making it easy to take at home, at work, or when you travel.

Precautions: Consult a health care practitioner prior to use if you are pregnant or breast feeding.

Composition:

Medicinal Ingredients: Vitamin C, Boron, Cobalt, Iodine, Nickel, Potassium, Silicon, Vanadium

Non-Medicinal Ingredients: Fulvic Acid, Water, Lemon Natural Flavor, Stevia, Citric Acid, Potassium Sorbate

Dosage: Mix 1 tube in 500ml of water, 1 to 3 times per day.

Presentation:

- 7 x 5ml Tubes – UPC: 628110696427
- 30 x 5ml Tubes – UPC: 628110696410
- 100ml Bottle (Lemon Flavoured) – UPC: 628110696212
- 100ml Bottle (No Flavour) – UPC: 628110696229
